

MONEY SAVING HACKS

We're not talking about curing the common cold (hack, hack), drivers across the country waste hundreds, if not thousands of dollars because they're not taking advantage of some simple steps that can extend the life of their tires - and their vehicle as a whole. Before hitting the road, be sure you keep these things in mind:

ROTATE EVERY 5000 MILES

GET AN ALIGNMENT

SAVE AT THE PUMP

CHEAPEST TIRE ISN'T ALWAYS THE SMARTEST

 Tire A	COST \$127	MILES WARRANTY 100,000	TREAD DEPTH 11
 Tire B	COST \$65	MILES WARRANTY 40,000	TREAD DEPTH 10

Even if you bought 2 of tire B, you are losing 20,000 miles
